

## APPLIED PHYSICS LAB MANUAL

### TABLE OF CONTENTS

| S.No  | Name of Experiments                                                                         |
|-------|---------------------------------------------------------------------------------------------|
| i.    | INTRODUCTION TO LABORATORY EQUIPMENTS                                                       |
| ii.   | RESISTER , & RESISTER COLOR CODING                                                          |
| iii.  | OHM'S LAW                                                                                   |
| iv.   | SERIES DC CIRCUITS                                                                          |
| v.    | PARALLEL DC CIRCUITS                                                                        |
| vi.   | TO VERIFY KIRCHHOFF'S VOLTAGE LAW FOR A SERIES RESISTIVE NETWORK                            |
| vii.  | TO VERIFY KIRCHHOFF'S CURRENT LAW FOR A PARALLEL RESISTIVE CIRCUIT                          |
| viii. | TO UNDERSTAND THE OPERATION OF VOLTAGE-CURRENT CHARACTERISTICS OF DIODE                     |
| ix.   | TO UNDERSTAND THE OPERATION OF HALF WAVE RECTIFICATION                                      |
| x     | TO UNDERSTAND THE OPERATION OF FULL WAVE BRIDGE RECTIFICATION                               |
| xi    | CAPACITORS AND ITS APPLICATIONS                                                             |
| xii   | UNDERSTANDING AND FUNCTION OF TRANSISTOR<br>TRANSISTOR AS SWITCH<br>TRANSISTOR AS AMPLIFIER |
